The Critical Bottlenecks Crippling Indian Outpatient Clinics

80%+ of India's 1.3M+ doctors run standalone OPD practices burdened by administrative friction and patient drop-off.

#ñþ Clinical Documentation

Doctors spend 3 to 5 minutes per patient typing into clunky software or scribbling on paper.

- Doctor fatigue during peak 50+ patient footfall hours.
- Unreadable handwriting causes dangerous pharmacy dispensing errors.
- Existing EMRs are bulky enterprise clones that doctors abandon within 2 weeks.
- Zero standard dosage autofill for Indian generic and brand medicines.

Ø=ÜÉ Patient Non-Adherence

Over 45% of patients forget medication schedules or abandon courses midway.

- Paper slips get torn, lost, or ruined within 48 hours of consultation.
- Patients forget critical food timing (Before food vs. After dinner).
- Chronic diabetes/hypertension patients miss monthly refill dates.
- Clinics lose patient follow-up revenue because there is zero digital tracking.

&þ Regulatory Liability

Unverified prescribing and telemedicine fraud expose clinics to severe legal action.

- NMC and Indian Medical Council enforcing strict doctor identity rules.
- No real-time license verification exists in existing prescription apps.
- Unqualified staff or quacks prescribing restricted Schedule X medications.
- Lack of digital tamper-proof signatures creates massive legal vulnerability.

RxNXT: The High-Speed Outpatient Clinical Operating System

Designed specifically for Indian doctors: prescribed in under 30 seconds, delivered on WhatsApp, fully regulatory-gated.

&¡ Fast Under 30-Second Prescribing

- Additive Scoring Search: Alias match (+100 pts), doctor habit (+50 pts), clinic fav (+20 pts).
- 1-Click Quick Chips: Frequency (1-0-1), Duration (5d), Food (After meals) in 1 tap.
- Protocol Packs: Load full complex treatment templates (e.g. "Viral Fever") in 1 click.
- 1-Click Cloning: Clone previous visits for chronic returning patients in under 2 seconds.
- Restricted Drug Shield: Built-in safety blocks for narcotics and Schedule X drugs.

Ø=Ü¬ Direct Meta WhatsApp Cloud API (v20.0)

- Zero Third-Party Aggregators: Direct official Graph API v20.0 (no Twilio, no Render).
- Official Document Delivery: Prescription PDF uploaded directly to Meta /media endpoint.
- Smart Slot Dose Alerts: Automated 3-slot nudges (8:00 AM, 1:00 PM, 8:30 PM IST).
- Chronic Care Refill Alerts: Proactive Day-25 refill reminders for hypertension & diabetes.
- Direct Cost Savings: Meta base rate ~¹0.13/msg vs. ¹0.75+ on thi

Ø=Þáþ Live Government NMC Verification (~0.4s)

- Direct National Medical Commission REST API covering all 24+ Indian State Councils.
- Mandatory Onboarding Gate: Workspace creation blocked until government license verified.
- Auto-Lock Profile: Doctor's registered name, degrees (MBBS/MD) locked from govt data.
- Tamper-Proof Digital Signature: Embedded in all generated prescription PDFs.
- Zero-Cost API: Zero verification API charges, maintaining high SaaS gross margins.

Ø=ÜÄ Client-Side PDF Engine (Zero Server CPU)

- 100% Client-Side Compilation: Prescriptions render in the doctor's browser via jsPDF.
- Zero Server Compute Overhead: Eliminates headless Chrome/Puppeteer ($50-$100/mo).
- Infinite Horizontal Scalability: 5,000 doctors generating PDFs consumes 0% server CPU.
- Professional Letterhead: Automated clinic logo, registration credentials, and signature.
- Sub-500ms PDF generation for seamless, instantaneous printing or WhatsApp dispatch.

100% Delivery of Phase 1 Grant Objectives

How the ₹7.0 Lakhs SISFS grant was deployed to take RxNXT from prototype to production cloud.

100% Cloud	~0.4s	< 30 Sec	v20.0
Supabase Mumbai PostgreSQL	Live NMC Verification Speed	Average Prescribing Time	Official Meta WhatsApp API

PHASE 1 DELIVERABLE	STATUS	TECHNICAL OUTCOME & ARCHITECTURAL IMPACT
PostgreSQL Cloud Migration	COMPLETED	Fully migrated from local SQLite to Supabase Mumbai (ap-south-1) with Prisma connection pooling.
NMC Doctor Gating Engine	COMPLETED	Integrated live government registry covering NMC & all 24+ State Councils; double-enforced on server.
Meta Cloud API Integration	COMPLETED	Direct Meta Graph API v20.0 integration; bypassed Render worker; zero cold-start delays.
Receptionist Queue Sync	COMPLETED	Live queue connecting front desk to doctor workspace with auto-resetting registration forms.
Mobile Progressive Web App	COMPLETED	Installable PWA manifest with thumb-friendly sticky action footer for fast smartphone prescribing.
Prescription Quick-Chips UI	COMPLETED	Replaced slow dropdowns with 1-click pills (1-0-1, 5 days, after meals) and protocol packs.
Unit Test Suite (34/34 passing)	COMPLETED	Full test coverage across doctor verification, drug additive search, and queue operations.

High-Margin SaaS Architecture: 75% to 80% Software Gross Margin

Priced for rapid Indian OPD adoption with near-zero marginal cost to serve each additional clinic.

Ø<ß÷þ Strategic 3-Tier Pricing Model

Designed to eliminate purchase friction for Indian private practitioners:

Tier 1: Solo GP (BYOD) — **Core Clinical OPD**

For doctors using existing laptops/tablets. Unlimited PDF prescriptions, OPD queue, cloud updates, and support.

Tier 2: Specialist Practice — **Patient Adherence**

Everything in Solo GP plus Daily 8 AM WhatsApp Morning Briefings, Day-25 chronic refill alerts, and adherence analytics.

Tier 3: Polyclinic Multi-Doctor — **Multi-Doctor Group**

For clinics with multi-doctor seating, in-house pharmacy inventory sync, dispensing billing queue, and consolidated analytics.

Ø=Üí Zero-Friction Clinical Onboarding:

The First 150 Free Prescriptions allow doctors to embed RxNXT directly into daily consultation workflows before selecting a subscription tier.

Ø=Üµ 1 Clinic Monthly Unit Economics

Demonstrating exceptional gross margins across a standard 20-clinic cohort:

Standard Clinic Subscription Plan	SaaS Model
Allocated Serverless Hosting (Vercel Pro)	- ¹60 / mo
Allocated PostgreSQL DB (Supabase Pro)	- ¹75 / mo
Meta WhatsApp Utility API (~600 msgs @ ¹0.13)	- ¹78 / mo
Client-Side PDF Generation (jsPDF)	¹0 / mo
Doctor Direct Self-Registration	¹0 / mo
Domain & SSL Amortization	- ¹5 / mo

NET GROSS PROFIT PER CLINIC: ¹615 / mo (73.8% Margi

Annual Net Profit on 100 Clinics: ¹7,38,000 / year on pure softw

Architectural Scalability: Validated up to 100 Clinics / 300 Doctors

How our zero-bloat serverless design prevents performance degradation as the customer base scales.

Ø=ÜÄ Prescription PDF Engine

- Capacity: Virtually Unlimited (")
- Why: Client-side jsPDF renders in browser DOM.
- Server Impact: 0% Server CPU / RAM consumption.
- Scaling Cost: ¹0 marginal cost at 50,00
- Resilience: Zero server crashes during clinic rushes.

Ø=Ü PostgreSQL Relational Stor

- Capacity: 3.5 Million Complete Prescriptions.
- Data Size: ~2.5 KB to 3 KB per complete consultation.
- Supabase Pro: 8 GB disk included; auto-scalable.
- Connection Pooling: Supavisor pooler in Mumbai.
- Daily Backups & Point-in-Time Recovery active.

Ø=Ü¬ Meta WhatsApp Pipeline

- Tier 1: 1,000 unique patients / rolling 24h.
- Tier 2: 10,000 unique patients / 24h (auto-upgrade).
- Concurrency: Throttled to 10 concurrent requests.
- Atomic Queue: FOR UPDATE SKIP LOCKED in DB.
- Zero duplicate or missed dose reminders.

Ø=Þ€ The Low-Cost Scaling Path from 100 to 1,000+ Clinics

1. Drug Search Cache: Caching the global drug catalog in Redis (Upstash) avoids database hits during doctor keystrokes (cost: $10/mo).
2. Reminder Queue Fan-Out: Offloading 8:00 AM bursts to serverless queue workers (Upstash QStash) enables 50,000 simultaneous nudges.
3. Multi-Clinic Phone ID Mapping: Large polyclinics can send from their own verified WhatsApp Business Number IDs seamlessly.

Result: The platform can comfortably scale to 1,000+ clinics across South India with under ¹25,000/month in total cloud expense.

Deployment of the ¹50 Lakhs Seed Expansion Capital

An 18-month commercial runway focused on clinic acquisition across Telangana and Andhra Pradesh.

¹20.0 L

40% • Clinical Sales & Onboarding

- 2 field sales reps in Hyderab Warangal.
- Onboard 150-200 paying clin
- Doctor CME events & demo t kiosks.
- Doctor referral commission structure.

¹15.0 L

30% • Product & AI Expansion

- Clinic Pharmacy stock auto-deduction.
- WhatsApp UPI / Razorpay payment links.
- AI Drug-Drug Interaction saf cross-check.
- Patient Mobile Health Portal (OTP).

¹8.0 L

16% • Compliance & ABDM

- Ayushman Bharat Digital Mis (M1/M2).
- Patient ABHA ID generation record sync.
- ISO-27001 data security certification.
- HIPAA compliance audit for expansion.

¹7.0 L

14% • Runway & Operations

- 18-month serverless cloud & DB reserve.
- Meta Enterprise WABA volume deposits.
- Customer support desk & hardware buffer.
- Legal, accounting & incubator filir fees.

Ø<ß¯ Target Financial Milestone on ¹50L Runway:

Reach 200 Paying Clinics by Month 12 → Generating ¹20,00,000 Annual Recurring Revenue (ARR).

Cashflow Breakeven Expected at 120 Clinics (Month 14). Series Pre-A Valuation Target: ¹12 to ¹15 Crores.

12-Month Operational Milestones & Growth Trajectory

Measurable quarterly execution targets from local incubator pilots to regional dominance.

Q1 • MONTHS 1 TO 3

Pilot Lock-In

- Onboard 30 active clinics across Warangal & Hyderabad.
- Doctor satisfaction NPS > 70 with verified < 30-second prescription speed.
- Meta Tier 2 verification (10,000 messages/day capacity).
- Publish Clinical Adherence Whitepaper with SRiX.

QUARTER TARGET

30 Clinics (₹3.0L ARR)

Q2 • MONTHS 4 TO 6

Commercial Launch

- Expand to 75 paying clinics across Telangana OPDs.
- Deploy Clinic Pharmacy Inventory module.
- Roll out instant WhatsApp UPI consultation payments.
- Recruit 2 regional medical representative partners.

QUARTER TARGET

75 Clinics (₹7.5L ARR)

Q3 • MONTHS 7 TO 9

Regional Scale

- Expand into Andhra Pradesh (Vijayawada, Vizag).
- Integrate ABDM M1/M2 for national health records.
- Deploy AI Clinical Decision Support cross-checker.
- Cross 100,000 monthly active patient prescriptions.

QUARTER TARGET

130 Clinics (₹13.0L ARR

Q4 • MONTHS 10 TO 12

Series Pre-A Round

- Surpass 200 paying clinics across 6 cities.
- Generate ₹20.0 Lakhs in Annual Recurring Revenue.
- Maintain 75%+ gross margin across all deployments.
- Open institutional ₹2.5 Crore Series Pre-A round.

QUARTER TARGET

200 Clinics (₹20.0L ARR)

The 30-Day Sprint to Unlock the ¹50L Tranche

Immediate roadmap to turn existing technological excellence into undeniable traction proof.

Step 1: Onboard 10-15 Doctors

TIMELINE: DAYS 1 TO 14

- Deploy RxNXT in 10-15 local OPD clinics.
- Leverage SRiX health network & local IMA chapters.
- Ensure doctors write 15-25 prescriptions/day.
- Collect direct doctor feedback on prescribing speed.

Step 2: Extract Traction Proof

TIMELINE: DAYS 15 TO 22

- Query DB: Total prescriptions written (>5,000).
- Verify clinical speed: Documented < 32s/prescription.
- Meta delivery metrics: Show >94% WhatsApp reach.
- Record 3 short video testimonials from doctors.

Step 3: Secure 3-5 Paid LOIs

TIMELINE: DAYS 23 TO 30

- Get 3-5 signed Letters of Intent or advance fees.
- Present traction metrics to SRiX Investment Board.
- Formally apply for SISFS Component 2 / DST Seed.
- Close the ¹50 Lakhs seed expansion tranche

Ø>Ý The Investment Ask: ¹50.0 Lakhs Seed Expansion

Seeking ¹50 Lakhs via SISFS Component 2 (Convertible Debenture / Debt) or DST NIDHI-SSS through SRiX Incubator.

We have completed Phase 1, proved the architecture, eliminated serverless costs, and locked in regulatory moats. We are ready to scale.
