CRITICAL COMMERCIAL REALITY: WHATSAPP IS A TRANSPORT PIPE, NOT THE SOFTWARE

When tiers differ primarily by WhatsApp messaging counts, doctors push back: "Meta charges 13 paise/msg. Why pay double (Rs 6,999 to Rs 12,999) for automated SMS/WhatsApp reminders?" WhatsApp is only the delivery pipe. To command higher subscription tiers, the value MUST be grounded in real clinical software technology: Longitudinal Vitals Graphing, AI Drug Safety Checks, Automated Pediatric Dosing, and Real-Time Batch Inventory FIFO Sync.

1. THE 3-TIER CLINICAL TECHNOLOGY HIERARCHY

TIER 1: SOLO GP

Prescribing Speed Engine

Rs 6,999 / yr (Rs 699/mo)

- Sub-20s Consultation Prescriber
- Typo-Tolerant Fuse.js Fuzzy Search
- Adaptive Doctor Habit Engine
- OPD Front-Desk Token Queue
- Client-Side jsPDF (<250ms DOM)
- Official NMC Registration Embed
- Instant WhatsApp PDF Delivery

TIER 2: SPECIALIST

Clinical Intelligence & Monitoring

Rs 12,999 / yr (Rs 1,299/mo)

- **Everything in Solo GP Tier**
- **Longitudinal Vitals Graphing**
- **AI Drug-Drug Interaction Shield**
- **Pediatric & Renal Dose Calculator**
- **Specialty Protocol Studio**
- **Chronic Care Retention Telemetry**
- **WhatsApp: 8 AM Briefings + Refills**

TIER 3: POLYCLINIC

Distributed Practice Infrastructure

Rs 24,999 / yr (Rs 2,499/mo)

- **Everything in Specialist Practice**
- **Up to 3 Doctor Seats Included**
- **Multi-Counter Queue State Machine**
- **In-House Pharmacy FIFO Stock Sync**
- **Batch Expiry & Reorder Alarms**
- **Direct Dispense Billing Terminal**
- **Consolidated Revenue Reconciliation**

2. THE 4 CORE SPECIALIST TECHNOLOGIES JUSTIFYING THE 2X UPGRADE

TECH 01 Longitudinal Vitals Graphing Engine

Interactive 6-12 month trendlines for BP (Sys/Dia), Fasting Sugar, HbA1c, and Serum Creatinine plotted automatically across visits. Doctors visually detect disease progression in 3 seconds.

TECH 02 AI Drug-Drug Interaction (DDI) Shield

Real-time contraindication detection protecting doctor medical licenses. Instantly alerts if ACE inhibitors conflict with potassium diuretics or if a drug is contraindicated in renal impairment.

TECH 03 Automated Pediatric Dose Calculator

Automatic mg/kg/day formulation calculation based on child weight. Converts complex pediatric suspensions (e.g. Amoxiclav syrup mg/ml) into exact ml doses without manual math errors.

TECH 04 Specialty Protocol & Titration Studio

Pre-configured complex multi-regime treatment bundles: Insulin sliding scale titrations, step-down steroid tapers, and multi-week antibiotic regimens populated with a single click.

3. COMPREHENSIVE TECHNOLOGY ARCHITECTURE MATRIX

CAPABILITY AREA	SOLO GP TIER (Rs 6,999/yr)	SPECIALIST TIER (Rs 12,999/yr)	POLYCLINIC HUB (Rs 24,999/yr)
Prescribing Engine	Sub-20s Prescriber + Fuse.js Alias Search	**Additive Habit Learning + Specialty Protocol Studio**	**Multi-Doctor Parallel Prescribing Engine**
Clinical Safety & AI	Schedule H / Narcotic Telemedicine Alerts	**AI Drug-Drug Interaction (DDI) + Pediatric Dose Calc**	**Clinic-Wide Drug Formulary & Restricted Stock Controls**
Patient Health Records	Basic Visit History & Electronic Letterhead	**Longitudinal Vitals Graphing (BP/Sugar/HbA1c Curves)**	**Central Multi-Doctor Patient Master Index (MPI)**
Practice Architecture	1 Doctor Seat + 1 Receptionist Desk	**1 Doctor + Receptionist + Adherence Telemetry**	**3 Doctor Seats + Pharmacy + Multi-Counter Queue**
Pharmacy & Dispensing	External Pharmacy PDF Link	**External Rx Link + Procedure Charge Slips**	**Integrated In-House Pharmacy FIFO Stock & Expiry Sync**
Billing & Revenue	Simple Consultation Invoices	**Consultation Invoices + Procedure Receipts**	**Split Revenue Audit: Doctor Fees vs. Pharmacy Margin**
WhatsApp Output Layer	Instant Branded Rx PDF Delivery	**Rx PDF + 8 AM Daily Briefings + Day-25 Chronic Alerts**	**Multi-Doctor PDF Delivery + Live Queue Token Pings**

4. THE DOCTOR ROI PROOF: WHY DOCTORS EASILY PAY THE HIGHER TIERS

WHY A SPECIALIST PAYS Rs 12,999 (NOT Rs 6,999)

1. Liability Protection: AI DDI checks protect against dangerous prescribing lawsuits.
2. Chronic Revisit ROI: In India, a specialist consultation fee is Rs 500-Rs 800. Just 2 to 3 returning chronic patients a month (via Day-25 refill alerts) pays for the entire software!
3. Clinical Time Savings: Pediatric dose calculations save 45 minutes of manual math daily.

WHY A POLYCLINIC PAYS Rs 24,999 (NOT Rs 12,999)

1. Stock Expiry Elimination: The average in-clinic pharmacy loses Rs 15,000-Rs 25,000/year to expired unmonitored medicines. FIFO tracking pays for RxNXT on stock savings alone.
2. Multi-Doctor Cost Amortization: Covers 3 doctors (only Rs 694/doctor/month).
3. Revenue Leakage Prevention: Unbilled medicines and procedures are flagged automatically.

THE COMMERCIAL WINNING PITCH TO DOCTORS:

"RxNXT is not an SMS marketing tool. It is an intelligent clinical workstation that protects your clinical safety, graphs your patients' health over 12 months, and automate
