1. The Healthcare Problem & Market Opportunity

MARKET GAP

Over 80% of India's 1.3 Million registered doctors operate independent outpatient practices that are bogged down by manual paper slips or clumsy enterprise hospital software:

🕒 3–5 Min Documentation Loss

Doctors spend 4 minutes per patient handwriting paper or clicking through slow dropdowns. Leads to severe fatigue during peak 50+ OPD rush hours and dangerous pharmacy dispensing errors.

📄 45%+ Patient Non-Adherence

Paper prescriptions get ruined or lost within 48 hours. Patients forget meal instructions (Before vs. After Food), abandon antibiotic courses midway, and miss monthly chronic refills.

⚠️ Regulatory & Quackery Risk

Lack of real-time medical council license verification in current software exposes clinics to legal liability and allows unqualified staff to prescribe restricted Schedule X medications.

2. The RxNXT Solution & Clinical Moats

PROPRIETARY TECHNOLOGY

⚡ Sub-30s Prescribing Workflow

- ✓ **Additive Scoring Search:** Exact aliases (+100 pts), doctor favorites (+50 pts), and clinic formulary (+20 pts).
- ✓ **1-Click Quick Chips:** Dosage, duration, and meal timing selected in one tap (1-0-1, 5 days, After meals).
- ✓ **Protocol Packs:** 1-click loading of entire treatment sets (e.g., "Viral Fever Protocol").
- ✓ **1-Click Cloning:** Instant prescription renewal for returning chronic patients.

💬 Direct Meta WhatsApp Cloud API (v20.0)

- ✓ **Official Document Delivery:** Prescriptions uploaded directly to Meta Media API and delivered as official PDF attachments.
- ✓ **Zero Intermediaries:** Bypassed Twilio and web scrapers; direct enterprise Meta Graph API.
- ✓ **Smart Slot Dose Alerts:** 3 automated daily schedules (8:00 AM, 1:00 PM, 8:30 PM IST).
- ✓ **Day-25 Chronic Refill Engine:** Automated alerts for diabetic and hypertension patients.

Live NMC Government License Verification

- ✓ **Direct National Medical Commission REST API:** Live credentials query covering NMC and all 24+ Indian State Councils in ~0.4s.
- ✓ **Mandatory Gate:** Workspace creation blocked until government records confirm legitimate practitioner status. Doctor's name and degrees are auto-locked.

Zero-Server-CPU PDF Engine (jsPDF)

- ✓ **Client-Side Rendering:** PDFs compile inside the doctor's web browser DOM.
- ✓ **Zero Compute Costs:** 5,000 doctors generating PDFs at the exact same second consumes 0% server CPU, eliminating \$50–\$100/mo headless Chrome servers.

3. Phase 1 (₹7.0 Lakhs) Milestones Delivered

AUDIT PROOF

Phase 1 Commitment	Status	Technical Outcome & Production Architecture
Cloud DB Migration	COMPLETED	Migrated from local SQLite to Supabase Mumbai Cloud PostgreSQL (ap-south-1) with Prisma connection pooling.
NMC Verification Engine	COMPLETED	Direct live REST API connection covering NMC + 24 State Councils; double-validated on server-side registration.
Meta WhatsApp Integration	COMPLETED	100% Meta Graph API v20.0. Eliminated Render microservice and third-party scrapers. Direct PDF upload to Meta /media.
Reception Queue Sync	COMPLETED	Real-time live queue connecting reception to doctor workspace with auto-resetting intake forms.
Mobile Progressive Web App	COMPLETED	PWA manifest + Apple iOS standalone metadata with thumb-accessible sticky footer for fast smartphone prescribing.
Test Suite & Diagnostics	COMPLETED	Full unit test coverage across doctor verification, drug additive search, and queue operations (34/34 passing).

4. Business Model & High-Margin Unit Economics

FINANCIALS

📁 3-Tier Pricing Model (from Masterplan)

Engineered to eliminate purchase friction for Indian private OPDs:

- ✓ **Tier 1: BYOD SaaS Only — ₹9,999 / year** (~₹833/mo) for single doctors using existing laptops/tablets.
- ✓ **Tier 2: Complete Hardware Bundle — ₹24,999 One-Time** (Dedicated 11" Android Kiosk Tablet + Stand + 1-Yr SaaS).
- ✓ **Tier 3: Polyclinic Multi-Doctor — ₹18,000 / year** for 2 to 4 doctor practices with central receptionist routing.

💡 *The 2-Patient Pitch: Writing 3 prescriptions pays for the monthly software subscription. The remaining 500+ consultations are pure operational profit.*

📊 Single-Clinic Monthly Cost Breakdown

Component	Monthly Amount
Allocated Vercel Serverless Hosting	~₹60 / mo
Allocated Supabase Mumbai PostgreSQL	~₹75 / mo
Meta WhatsApp Utility API (~600 msgs @ ₹0.13)	~₹78 / mo
Client-Side PDF Engine (jsPDF)	₹0 / mo (Zero Server CPU)
TOTAL COST TO SERVE 1 CLINIC	~₹213 / month
NET MONTHLY PROFIT (from ₹833/mo)	₹620 / mo (74.4% Margin)

100-Clinic Cohort: ₹9,99,900 / Year at ~78% Net Margin

Total cloud + WhatsApp cost across 100 clinics is only ~₹2,04,000 / year (~₹17,000/mo), leaving ₹7,95,900 / year in pure operational cashflow!

5. Capital Deployment: ₹50 Lakhs Seed Expansion

USE OF FUNDS

₹20.0 Lakhs (40%) — Clinical Sales & Expansion

Direct deployment into physician acquisition across Telangana & AP:

- ✓ 2 field sales reps covering Hyderabad, Warangal, and Vijayawada.
- ✓ Target: Onboard 150 to 200 paying clinics at ₹9,999/yr.
- ✓ Doctor CME sponsorships, live OPD kiosk demos, and referral rewards.

₹15.0 Lakhs (30%) — Product & AI Expansion

Horizontal monetization modules requested by pilot doctors:

- ✓ In-clinic Pharmacy Stock Sync (auto-deducts inventory upon prescribing).
- ✓ WhatsApp UPI & Razorpay billing links for receptionist payment collection.
- ✓ AI Drug-Drug Interaction and contraindication clinical warnings.

₹8.0 Lakhs (16%) — ABDM & Compliance

Government healthcare compliance and national integration:

- ✓ Ayushman Bharat Digital Mission (ABDM M1/M2) sandbox certification.
- ✓ Patient ABHA ID generation and health record locker linking.
- ✓ ISO-27001 and HIPAA data security audit certifications.

₹7.0 Lakhs (14%) — 18-Month Operational Runway

Working capital buffer ensuring uninterrupted operations:

- ✓ 18-month Supabase Pro & Vercel Pro cloud hosting reserve.
- ✓ Meta Enterprise WABA volume security deposit.
- ✓ Hardware buffer, legal accounting, and incubator filing fees.

6. 12-Month Execution Roadmap & 30-Day Sprint

MILESTONES

QUARTER	TRACTION TARGET	KEY DELIVERABLES & COMMERCIAL MILESTONES
Q1 (Months 1–3)	30 Clinics (₹3.0L ARR)	Lock in local Warangal & Hyderabad pilot clinics; Meta Tier 2 verified (10k msgs/day); Doctor NPS > 70.
Q2 (Months 4–6)	75 Clinics (₹7.5L ARR)	Commercial scale across Telangana OPDs; deploy Clinic Pharmacy module & WhatsApp UPI payments.
Q3 (Months 7–9)	130 Clinics (₹13.0L ARR)	Regional expansion into Andhra Pradesh (Vijayawada, Vizag); full ABDM M1/M2 integration.
Q4 (Months 10–12)	200+ Clinics (₹20.0L ARR)	Cashflow positive operations; >150,000 prescriptions/mo; open ₹2.5 Cr Series Pre-A institutional round.

🎯 **The Immediate 30-Day Sprint to Unlock the ₹50L Funding**

Step 1 (Days 1–14): Onboard 10–15 pilot doctors in Warangal & Hyderabad using SRiX's healthcare network.

Step 2 (Days 15–22): Query database for verified traction (5,000+ prescriptions, <32s prescribing time, >94% WhatsApp delivery).

Step 3 (Days 23–30): Collect 3–5 signed Letters of Intent (LOIs) and formally submit the **SISFS Component 2 / DST NIDHI-SSS application** to the SRiX Investment Committee.
