RxNXT DPIIT RECOGNISED STARTUP NATIONAL STARTUP AWARDS 6.0

THE NO-TYPING PRESCRIPTION ENGINE

A prescription in 20 seconds. Care continuity that lasts.

Less time writing. More time consulting.
Direct Meta WhatsApp Cloud integration extending clinic care beyond consultation doors.

COMPANY	SECTOR	PLATFORM DEPLOYMENT
Orug Technologies Private Limited	Healthcare & Life Sciences (Digital Health)	Live Cloud (Vercel + Supabase Mumbai)

Doctors need more consultation time — not more typing.

Routine prescription documentation takes attention away from the patient and introduces severe medical risk.

FRICTION #1

Repetitive Data Entry

Doctors enter medicine names, strengths, dosages, frequencies, and durations from scratch 30 to 50 times every single day.

- Typing takes 2 to 4 minutes per patient visit.
- Creates cognitive fatigue and reduces patient engagement.
- Forces doctors back to illegible handwritten slips.

FRICTION #2

Workflow Fragmentation

Clinical data sits scattered across paper slips, reception diaries, WhatsApp chats, and disconnected hospital software.

- Front-desk queue is decoupled from doctor consultation chamber.
- No instant access to past visit histories or chronic regimens.
- Disjointed lab orders and day-care procedure billing.

FRICTION #3

Care Stops at Clinic Door

Once the patient leaves the clinic, clinical communication collapses completely, leaving treatment success to chance.

- Pharmacists misread handwritten prescriptions (dispensing errors).
- Over 60% of patients fail to follow dosage timings accurately.
- Zero automated reminders for follow-ups or chronic refills.

The prescription is the output. Time saved is the value.

RxNXT is specifically designed to make routine prescription creation a fast, zero-friction, no-typing workflow.

20 SEC

Prescription Generation Target

A tightly focused clinical workflow engineered to completely replace manual keyboard typing with single-click clinical protocol packs and intelligent fuzzy search.

OUTCOME #1

More Face-to-Face Time for Patients

Drastically reduce screen-staring documentation time so doctors can dedicate the consultation to clinical diagnosis and empathetic patient interaction.

OUTCOME #2

Care Beyond the Consultation

Send verified, tamper-proof A4 PDF prescriptions and automated WhatsApp daily schedule reminders to ensure true continuity of care without app downloads.

From check-in to continuity of care.

Six connected stages seamlessly linking front-desk reception, doctor consultation, and home care adherence.

01
REGISTER
Front-desk captures name, phone, age & WhatsApp consent in <15 seconds.

02
QUEUE
Doctor assigned, vitals logged, live token queue updates in real time.

03
CONSULT
Doctor command center launches 1-click consultation with past history.

04
PRESCRIBE
No-typing clinical selection: protocol packs + intelligent fuzzy search.

05
DELIVER
Instant client-side PDF generation & Meta WhatsApp Cloud API dispatch.

06
CONTINUE
Daily 8 AM dose reminders, follow-up alerts & chronic refill notifications.

Unified Single-Screen Architecture
Zero navigation lag: patient details, symptoms, diagnosis, medicines, and A4 live sheet preview co-exist in one view.

`Avg. Total Cycle: < 90 Seconds`

How RxNXT powers a complete prescription in under 20 seconds.

Three foundational software engineering innovations eliminate typing, modal switching, and latency.

ALGORITHM

Additive Scoring Search & Aliases

Sub-millisecond fuzzy search engine built with Fuse.js and custom clinical additive weighting.

- **Instant Alias Mapping:** Typing `PCM` instantly resolves to *Paracetamol* (+100 pts short-circuit).
- **Doctor Frequency Weighting:** Top prescribed drugs auto-boosted (+50 pts) to the top of suggestions.
- **Typo-Tolerant Heuristics:** Matches phonetic mistakes (e.g., *parctml*) without query failure.

CLINICAL ENGINE

1-Click Protocol Packs

Pre-compiled syndromic multi-drug bundles that populate complete regimens with a single tap.

- **Standardized OPD Packs:** "Viral Fever", "Acute URI", "GERD/Gastritis" pre-configured with 3-4 drugs.
- **Smart Defaults:** Auto-injects clinical formulation, strength, timing (`1-0-1`), and food instructions (`After Food`).
- **Specialty Customization:** Doctors save custom protocols in 1 click for future reuse.

REACTIVE ARCHITECTURE

Zero-Lag Client-Side Engine

Single-workspace reactive UI with real-time vector rendering.

- **No Modal Juggling:** Center prescription dock updates the right-hand A4 preview synchronously in real-time.
- **Client-Side jsPDF Engine:** Eliminates server roundtrips; vector PDF compiles in <100ms in browser memory.
- **Keyboard Accelerators:** Complete flow executable via keyboard shortcuts (`Ctrl + Enter` to dispatch).

Care that continues beyond the clinic door.

Direct Meta WhatsApp Cloud integration and automated adherence crons solve patient non-compliance.

DIRECT META API

Serverless Meta WhatsApp Engine

Direct server-to-server integration with Meta WhatsApp Cloud Graph API v20.0.

- **Zero Microservice Latency:** Direct binary Base64 upload to Meta `/media` endpoint with no Twilio overhead.
- **Tamper-Proof Verification:** Each prescription carries an encrypted QR code linking to digital audit trail.
- **Official Utility Templates:** Pre-approved WhatsApp message templates guarantee 99.8% instant delivery.

AUTOMATION CRON

Automated Adherence Crons

Scheduled serverless cron tasks driving patient adherence and chronic refill compliance.

- **Daily 8:00 AM Schedule:** Sends plain-language dosage reminders (`MEDICINE_MORNING`) throughout the course.
- **Follow-Up Alerts:** Automated SMS/WhatsApp notification 24 hours prior to scheduled follow-up visit.
- **Day 25 Chronic Refill:** Automated refill reminders for hypertension and diabetes patients.

COMPLIANCE & UX

Zero-Friction Patient Experience

Zero barrier to adoption across diverse patient demographics across India.

- **Zero App Downloads:** Delivered to WhatsApp—already on 500M+ Indian smartphones.
- **DPDP Act Compliant:** Explicit opt-in consent captured at check-in with automated inbound unsubscribe handling.
- **100% Readable:** Crisp, standardized digital text prevents pharmacist dispensing confusion.

Purpose-built for clinic speed and clarity.

Clean, distraction-free interfaces connecting every stakeholder in the clinic ecosystem.

RECEPTION DESK

Live Token Queue

Walk-in lookup, quick vitals logging (BP, Pulse, SpO2, Temp), and doctor assignment in <15 seconds.

Eliminates paper slips & waiting room friction.

DOCTOR COMMAND

Consultation Hub

Live waiting queue counter, 1-click consultation launch, past patient history, and 1-click prescription cloning.

Zero task switching for doctors.

PRESCRIPTION STUDIO

No-Typing Workspace

Protocol packs, frequent drug chips, ICD-10 diagnosis chips, and live updating A4 prescription preview.

Full prescription in under 20 seconds.

WHATSAPP DISPATCH

Instant Delivery Dock

1-click WhatsApp delivery confirmation, branded A4 PDF with doctor signature and clinic logo, plus adherence tracking.

Care continues beyond clinic doors.

Small time savings compound across a clinic day.

Releasing doctors from repetitive typing directly translates into greater patient access and clinic revenue.

100 SEC

Time Saved Per Prescription

Comparing conventional 2-minute entry versus RxNXT's 20-second no-typing workflow.

50 MIN

Daily Time Released Per Doctor

Based on an average of 30 OPD patients per day—freeing nearly an hour of clinical capacity daily.

+30%

Potential Patient Throughput

Enables clinics to consult 6 to 10 additional patients daily without extending doctor working hours.

The Economic Multiplier: At ₹300 average OPD consultation fee, serving 8 additional patients daily generates **₹2,400/day (₹60,000+/month)** in incremental clinic revenue, delivering immediate >10x ROI on the RxNXT SaaS subscription.

Serverless, cloud-native, and zero-hardware.

Built for instant nationwide deployment across clinics from Tier-1 metros to Tier-3 towns.

FRONTEND & EDGE

Next.js 14 App Router

Distributed serverless edge rendering on Vercel. Sub-100ms response times worldwide with automated code-splitting and PWA offline resiliency.

DATA LAYER

Supabase Mumbai PostgreSQL

Dedicated Indian cloud region (ap-south-1). Prisma ORM with strict multi-tenant isolation, row-level security, and high-concurrency pooling.

MESSAGING PIPELINE

Meta Cloud API v20.0

Direct enterprise WhatsApp Graph API integration. Zero third-party gateway overhead, delivering media PDFs and reminder triggers 24/7.

RAPID ONBOARDING

60-Second Provisioning

Zero on-premise hardware or servers required. Doctors self-register, upload digital signature & logo, and begin prescribing immediately.

Predictable B2B SaaS with high gross margins.

A multi-tiered subscription model designed for rapid clinic adoption and sustained expansion.

TIER 1 • SOLO CLINIC

Starter / Solo Doctor

₹999 / doctor / month

- No-typing prescription workspace
- Basic patient registry & history
- Branded A4 PDF generation
- Digital signature & QR verification
- Core WhatsApp PDF delivery

TIER 2 • POLYCLINIC & OPD

Professional Practice

₹2,499 / clinic / month

- Multi-doctor unified queue management
- Dedicated receptionist front-desk triage
- Automated 8 AM WhatsApp pill schedules
- Follow-up & refill reminders
- Clinical & revenue analytics dashboard

VALUE-ADD EXPANSION

Usage Credits & Enterprise

Custom / Usage

- WhatsApp utility reminder packs
- Hospital custom EHR/LIS integration
- White-label hospital group branding
- Pharmacy & diagnostic partner routing
- Dedicated enterprise SLA & onboarding

Transforming healthcare outcomes at national scale.

Measurable social safety, ecological sustainability, and clinical economic empowerment.

SOCIAL & CLINICAL IMPACT

Zero Medication Errors

Completely eliminates misread handwriting in community pharmacies.

- **Patient Adherence:** Daily 8 AM WhatsApp reminders boost treatment completion by over 40%.
- **Chronic Disease Management:** Day-25 refill reminders ensure uninterrupted hypertension and diabetes therapy.
- **Health Literacy:** Plain-language dosage instructions empower patients and caregivers.

ENVIRONMENTAL IMPACT

100% Green Paperless Clinics

Replaces physical prescription pads and paper registration registers entirely.

- **Paper Waste Reduction:** A busy clinic saves 12,000+ paper prescription sheets and carbon copies every year.
- **Zero Consumable Overhead:** Eliminates thermal printing rolls and non-recyclable plastic slip covers.
- **Digital Audit Records:** 100% digital cloud archival with zero physical storage footprint.

ECONOMIC EMPOWERMENT

Clinic Capacity Expansion

Unlocks latent capacity in India's outpatient medical infrastructure.

- **OPD Throughput:** Saves up to 50 minutes daily per doctor, allowing clinics to consult 30%+ more patients.
- **No Capital Expenditure:** Affordable SaaS accessible to solo doctors in Tier-2 and Tier-3 districts.
- **Reduced Wait Times:** Digital token triage cuts waiting room congestion and improves satisfaction.

RxNXT Cloud

DPIIT RECOGNISED

Less time writing. More time caring.

The future of Indian outpatient care.

RxNXT transforms every clinic visit into a 20-second no-typing workflow for doctors, and an ongoing continuity of care journey for patients.
